# LOOK FAMILIAR?

# GUARANTEED TO WORK IN WET WEATHER

- + Thermally Resilient
- + Works in Water & All Weather
- + Bonds to Asphalt & Concrete
- + Instantly Traff c-Ready
- + Stockpiles for Months
- + No Mixing, No Tack
- + Performance-Proven

# RETHINK YOUR ASPHALT

EZ Street is a technologically advanced, all-temperature asphalt. It's ready to go right out of the bag, or off the stockpile, without heat, or any special treatment.

# HOW IT WORKS

## Sweep

Sweep out the area. Make sure to remove all loose debris, broken pieces of pavement, and dust. Where possible square the edges for better longevity of repair.

## Fill

Holes and crevasses can be filled – in 50 mm lifts – with EZ Street Cold Asphalt, compacted properly (see next step). Perform this step in layers if holes are deeper than 50 mm.

## Compact

Using a tamper, compact the EZ Street Asphalt to just over the existing pavement level. For a more secure repair a mechanical compactor may be used. Traffic will provide secondary compaction.

\*When applied properly, EZ Street repairs will outlast the surrounding hot mix

# HOW MUCH DO I NEED?

20 KG BAGS

Coverage Guide

3 bags  
1.0 m<sup>2</sup>

6 bags  
2.0 m<sup>2</sup>

9 bags  
3.0 m<sup>2</sup>

\*Measurements based on 25 mm depth

# A NEW APPROACH TO PACKAGING

Exciting news! Our EZ Street asphalt product in New Zealand now has eco-friendly packaging with up to 20% recycled PET material. Our new EZ Street Asphalt bucket is also a global first, made from 100% recycled New Zealand plastic, and it uses 33% less plastic in the liner with Ecolite material. This eco-friendly update has been a national success.
